

## Definition

EASY JACKET CODE 31782

## Description and principle of operation

The EASY JACKET has been designed to be suitable for all the HT harnesses in the TRACTEL range. Once the user has positioned the jacket on the harness, the straps can be quickly threaded through. The jacket is extremely comfortable to wear, and is quick and simple to put on and take off. It is machine washable.

The Easy jacket is made of orange polycotton. It is positioned on the harness using press studs. Its unique shape means that it adapts to the design of the harness.

The Easy Jacket is one size and is suitable for all the harnesses in the HT range. Its strong polycotton fabric is grease-resistant, and its orange colour ensures high visibility. Once the Easy jacket has been positioned on the harness, it is quick and easy to thread the straps through.

## Technical specification

Orange polycotton jacket

Steel press studs

Machine wash at 30 °C
